

FIRE RISK ASSESSMENT

Regulatory Reform (Fire Safety) Order 2005

Employer or other Responsible Person: Acle Parish Council

Address of Property: : The Food Bank / Offices

The Street Acle Norwich NR13 3DY

Person(s) Consulted: Barry Coveley

Assessor: Andrew Goodall

Date of Fire Risk Assessment: 21st February 2022

Date of Previous Fire Risk Assessment: 11th February 2021

Suggested Date for Review¹: February 2023

The purpose of this report is to provide an assessment of the risk to life from fire in these premises, and, where appropriate, to make recommendations to ensure compliance with fire safety legislation. The report does not address the risk to property or business continuity from fire.

The report constitutes neither a warranty of future results by Flameskill Ltd nor an assurance against risk. It is submitted on best judgement of the consultant involved in its preparation,

¹ This fire risk assessment should be reviewed by a competent person by the date indicated above or at such earlier time as there is reason to suspect that it is no longer valid or there have been significant changes

Page 2of 15

and is based, in part, on information provided by others during the inspection. And no liability whatsoever is accepted for the accuracy of such information.

We would recommend that you discuss this risk assessment with your insurer to confirm that you have adequate cover in place until recommendations have been implemented.

AN INTRODUCTION TO THE LAW

The term 'fire precautions' includes matters which are the subject of legal requirements under specific fire precautions legislation. These include the Fire Regulations and, more generally, under health and safety legislation including the Health and Safety at Work etc Act 1974 and regulations made under that Act.

Fire precautions legislation deals with general fire precautions. These include:

- means of detection and giving warning in case of fire;
- the provision of means of escape;
- means of fighting fire: and
- the training of staff in fire safety.

The Fire Regulations also include a requirement to undertake an assessment of the fire risks. (In this guide, the term 'fire risk' collectively describes both the risk of fire occurring and the risk to people in the event of fire.)

Between them, the Fire Regulations and the Management of Health and Safety at Work Regulations 1992 (as amended) require you to:

- carry out a fire risk assessment of your workplace (you must consider all your employees and all other people who may be affected by a fire in the workplace and you are required to make adequate provision for any disabled people with special needs who use or may be present at your premises);
- identify the significant findings of the risk assessment and the details of anyone who might be especially at risk in case of fire (these must be recorded if you employ more than five people):
- provide and maintain such fire precautions as are necessary to safeguard those who use your workplace; and
- provide information, instruction and training to your employees about the fire precautions in your workplace.

The risk assessment will help you decide the nature and extent of the process and general fire precautions which you need to provide.

There are other legal duties you need to know:

- Where it is necessary to safeguard the safety of your employees, you must nominate people to undertake any special roles which are required under your emergency plan (you can nominate yourself for this purpose).
- You must consult your employees (or their elected representatives or appointed trade union safety representatives) about the nomination of people to carry out particular roles in connection with fire safety and about proposals for improving the fire precautions.
- ■You must inform other employers who also have workplaces in the building of any significant risks you found which might affect the safety of their employees and co-operate with them about the measures proposed to reduce/control those risks.
- If you are not an employer but have any control of premises which contain more than one workplace, you are also responsible for ensuring that the requirements of the Fire Regulations are complied with in those parts you have control over.

Page 3of 15

The following simple risk level estimator is based on a more general health and safety risk level estimator of the type contained in BS 8800:

	VO.
Risk level	Action and timescale
Trivial	No action is required and no detailed records need to be kept
Tolerable	No major additional controls required however, there might be a need for
Tolerable	improvements that involve minor or limited cost.
	It is considered that efforts are made to reduce the risk. Risk reduction measures
	should be implemented within a defined time period.
Moderate	Where moderate risk is associated with consequences that constitute extreme
woderate	harm, further assessment might be required to establish more precisely the
	likelihood of harm as a basis for determining the priority for improved control
	measures.
	Considerable resources might have to be allocated to reduce the risk. If the
Substantial	building is unoccupied; it should not be occupied until the risk has been reduced.
	If the building is occupied, urgent action should be taken.
Intolerable	Building (or relevant area) should not be occupied until the risk is reduced

(Note that, although the purpose of this section is to place the fire risk in context, the above approach to fire risk assessment is subjective and for guidance only. All hazards and deficiencies identified in this report should be addressed by implementing all recommendations contained in the following action plan. The fire risk assessment should be reviewed regularly.)

Taking into account the fire prevention measures observed at the time of this risk assessment, it is considered that the hazard from fire (likelihood of fire) at these premises is:

Potential consequences of fire	Slight harm	Moderate harm	Extreme harm
Fire hazard ▼			
Low	Trivial risk	Tolerable risk	Moderate risk
Medium	Tolerable risk	Moderate risk	Substantial risk
High	Moderate risk	Substantial risk	Intolerable risk

Taking into account the nature of the building and the occupants, as well as the fire protection and procedural arrangements observed at the time of this risk assessment, it is considered that the consequences for life safety in the event of fire would be:						
Trivial	Tolerable	Moderate	Substantial	Intolerable		

Important Note

This Fire Risk Assessment may identify Significant Findings and where required, detail an Action Plan, Recommendations and prioritise implementation.

General information

ı	The premises		
1.1	Number of floors:		2
1.2	Approximate floor area:	55	m2 per floor m2 gross m2 on ground floor
1.3	Brief details of construction: Brick and timber frame with pitched, pantile roof.		
1.4	Use of premises: Community food bank store on ground floor. 1 st flocurrently unoccupied.	oor	
2	The occupants		
2.1	Approximate maximum number:		2
2.2	Approximate maximum number of employees at any one time:		2
2.3	Maximum number of members of public at any one time:		?
3	Occupants at special risk		
3.1	Sleeping occupants:		0
3.2	Disabled occupants:		?
3.3	Occupants in remote areas and lone workers:		0
3.4	Young persons:		0
3.5	Others		0
4	Fire loss experience		Nil
5	Other relevant information		

(FlameSkill)

6.1	The following fire safety legislation applies to these premises
	Regulatory Reform (Fire Safety) Order 2005
6.2	The above legislation is enforced by: Norfolk Fire and Rescue
6.3	Other legislation that makes significant requirements for fire precautions in these premises (other than the Building Regulations 2000):
6.4	The legislation to which 6.3 makes reference to is enforced by
6.5	Comments
	Fire hazards and their elimination or control
7	Electrical sources of ignition
7.1	Reasonable measures taken to prevent fires of electrical origin? Yes No
7.2	More Specifically: Fixed installation periodically inspected and tested? Portable appliance testing carried out? Suitable policy regarding the use of personal electrical appliances? Suitable limitation of trailing leads and adapters? Yes No No
7.3	Comments and hazards observed: At the time of inspection, the Fixed Electrical Installation was still out of date, however major renovation is planned for April 2022. (See Action 7.3 Below).
8	Smoking
8.1	Reasonable measures taken to prevent fires as a result of smoking? Yes No
8.2	More Specifically: Smoking prohibited in the building? Smoking prohibited in appropriate areas? Suitable arrangements for those who wish to smoke? This policy appeared to be observed at time of inspection? N/A Yes No No No No
8.3	Comments and hazards observed: Broadly Compliant

Page 6of 15

9	Arson	
9.1	Does basic security against arson from outsiders appear reasonable ² ?	Yes No
9.2	Is there any absence of unnecessary fire load in close proximity to the premises or available for ignition by outsiders?	Yes No
9.3	Comments and hazards observed:	
	Broadly Compliant	
10	Portable heaters and heating installations	
10.1	Is the use of portable heaters avoided as far as practicable?	Yes No
10.2	If portable heaters are used,	
	is the use of the more hazardous type (e.g. radiant bar fires or LPG Appliances) avoided?	N/A Yes No
	are suitable measures taken to minimize the hazard of ignition of combustible materials?	N/A Yes No
10.3	Are fixed heating installations subject to regular maintenance?	N/A Yes No
10.4	Comments and hazards observed:	
	Broadly Compliant	
11	Cooking	
11.1	Are reasonable measures taken to prevent fires as a result of cooking?	N/A Yes No
11.2	More specifically:	
	Filters changed and ductwork cleaned regularly?	N/A Yes No
	Suitable extinguishing appliances available?	Yes No
11.3	Comments and hazards observed:	
	Broadly Compliant	
12	Lightning	
12.1	Does the building have a lightning protection system?	Yes No No
12.2	Comments and hazards observed:	
	Broadly Compliant	

 $^{^2}$ **Note:** Reasonable only in the context of this fire risk assessment. If specific advice on security (including security against arson) is required, the advice of a security specialist should be obtained.

Page 7of 15

13	Housekeeping			
13.1	Is the standard of housekeeping adequate?		Yes	No
13.2	More specifically:			
	Combustible materials appear to be separated from ignition sources?		Yes	No
	Avoidance of unnecessary accumulation of combustible materials or waste?		Yes	No
	Appropriate storage of hazardous materials?	N/A	Yes	No
	Avoidance of inappropriate storage of combustible materials?		Yes	No
13.3	Comments and hazards observed: Broadly Compliant			
14	Hazards introduced by outside contractors and b	ouilding	works	
14.1	Are fire safety conditions imposed on outside contractors?		Yes	No
14.2	Is there satisfactory control over works carried out in the building by outside contractors (including "hot work" permits)?		Yes	No
14.3	If there are in-house maintenance personnel, are suitable precautions taken during "hot work", including use of hot work permits?	N/A	Yes	No
14.4	Comments			
	Broadly Compliant			
15	Dangerous substances			
15.1	If dangerous substances are, or could be, used, has a risk assessment been carried out, as required by the Dangerous Substances and Explosive Atmospheres Regulations 2002?	N/A	Yes	No
15.2	Comments			
	N/A			
16	Other significant fire hazards that warrant considerates process hazards that impact on general fire precessions.			ıg
16.1	Hazards:			
10.1	N/A			
16.2	Comments and deficiencies observed:			

Page 8of 15

Fire Protection Measures

FlameSkill)

17	Means of escape from fire		
17.1	It is considered that the building is provided with reasonable means of escape in case of fire.	Yes	No
17.2	More specifically:		
	Adequate design of escape routes?	Yes	No
	Adequate provision of exits?	Yes	No
	Exits easily and immediately openable where necessary?	Yes	No
	Fire exits open in direction of escape where necessary?	Yes	No
	Avoidance of sliding or revolving doors as fire exits where necessary?	Yes	No
	Satisfactory means for securing exits?	Yes	No
	Reasonable distances of travel:		
	Where there is a single direction of travel?	Yes	No
	Where there are alternative means of escape?	Yes	No
	Suitable protection of escape routes?	Yes	No
	Suitable fire precautions for all inner rooms?	Yes	No No
	Escape routes unobstructed?	Yes	No
17.3	It is considered that the building is provided with reasonable arrangements for means of escape for disabled occupants	Yes	No No
17.4	Comments and deficiencies observed:		1
	Broadly Compliant		
18	Measures to limit fire spread and development		
18.1	It is considered that there is:		
	compartmentation of a reasonable standard ³ .	Yes	No
	reasonable limitation of linings that may promote fire spread	Yes	No
18.2	As far as can reasonably be ascertained, fire dampers are provided as necessary to protect critical means of escape against passage of Fire, smoke and combustion products in the early stages of a fire? ³⁴	N/A Yes	No

 $^{^3}$ Based on visual inspection of readily accessible areas, with a degree of sampling where appropriate. 4 A full investigation of the design of the HVAC systems is outside the scope of this fire risk assessment.

18.3	Comments and deficiencies observed:		-		
	Broadly Compliant				
19	Emergency escape lighting		-		
19.1	Reasonable standard of emergency escape lighting system provided ⁵	Yes		No	
19.2	Comments and deficiencies observed:				
	Evidence showed no external emergency escape lighting outside the designated fi exit door. (See Action 19.2 below).	nal			
20	Fire safety signs and notices				
20.1	Reasonable standard of fire safety signs and notices?	Yes		No	
20.2	Comments and deficiencies observed:		_		
	Broadly Compliant]		
21	Means of giving warning in case of fire				
21.1	Reasonable manually operated electrical fire alarm system provided ⁶ ?	Yes		No	
21.2	5 5	Yes Yes		No No	
21.3	Extent of automatic fire detection generally appropriate for the occupancy and fire risk	Yes		No	
21.4	Remote transmission of alarm signals?	Yes		No	
21.5	Comments and deficiencies observed: Evidence showed that there was no satisfactory means of raising the alarm for bot adjoining premises. (See Action 21.5 below).	h]		
22	Manual fire extinguishing appliances				
22.1	Reasonable provision of portable fire extinguishers?	Yes		No	
22.2	Hose reels provided?	Yes		No	
22.3	Are all fire extinguishing appliances readily accessible?	Yes		No	
22.4	Comments and deficiencies observed:		=		
	Broadly Compliant				

 $^{^{5}}$ Based on visual inspection, but no test of illuminance levels or verification of full compliance with relevant British Standards carried out

 $^{^{6}}$ Based on visual inspection, but no audibility tests or verification of full compliance with relevant British Standard carried out.

Ref No	Heading	Comment	Recommendation	Priority Rating	Date completed	Revised Rating
7.3	Electrical Sources of Ignition	At the time of inspection, the Fixed Electrical Installation was still out of date, however major renovation is planned for April 2022. (See Action 7.3 Below).	Testing is an obligation under the 18th Edition Wiring Regulations BS 7671:2018. The maximum period between inspections and testing in an industrial environment is 3 years whereas for commercial premises it's 5 years. This will be signed off after completion of renovation.			
19.2	Emergency escape Lighting	Evidence showed no external emergency escape lighting outside the designated final exit door.	Emergency escape lighting should be provided on external escape routes to the final place of safety if necessary. Emergency escape lighting installations should comply with the requirements of BS 5266: Emergency lighting. Code of practice for the emergency lighting of premises. Emergency Lighting should be fitted to the inside and outside of designated final exit doors, plus where there are changes in direction of an escape route or changes in floor level. This will form part of the renovation scheduled for April 2022.
